MANAGEMENT

## ment System

**ment System** is a comprehensive modular solution, currently suitable for Stoichiometric or Lean Burn Industrial replacement. Following modules complete this system:

### Gas Mixer System

Gas mixing systems for small, medium and large capacity engines.

### Lambda Control

Air fuel ratio controllers based on Boostpressure or O2 Probe for turbo and naturally aspirated engines.

### Integrated Throttle Bodies

Integrated throttle actuators with position feedback.

### Governor

A series of speed governor specially designed for gas engines.

### Ignition System

Ignition system CAN Bus controlled with additional periphery.

### CHP Controller / SCADA System

Gas engine and generator main controller for single and parallel operation including SCADA solution.

### Gas Admission (Injection) Valve

### Dual Fuel

Dual Fuel conversion kits.
